BIOGRAPHY

Colin is a seasoned executive with over 30 years' leadership experience across the petrochemical, environmental remediation, mechanical Services, telecommunications, human resources, and insurance Sectors. He has extensive practical experience and expertise in strategic market & organizational development, merger & acquisition, enterprise risk and performance management within SME, Large and ASX organizations operating across technical and professional services environments.

He has expert technical knowledge of the design, construction, maintenance, divestment and environmental remediation of petroleum storage and handling facilities through his thirty plus years' experience in the petrochemical industry. He also obtained a strong technical knowledge of the construction, engineering, environmental and manufacturing sectors with over 40 years operating across these environments. Colin also has expertise in WHS, operational, and financial risk management along with human resource and high-performance organizational management.

Colin applies his experience, knowledge and skills across his executive management and non-executive director roles to drive operational excellence, growth, and value for all stakeholders.

ACHIEVEMENTS & NOTABLE ASSIGNMENTS

- **Strategic Business Development**

Corporatisation of JFTA Engineering Services and growing the business from \$15m to \$75m over a six-year period.

Development of GKA Investigations business from a key person entrepreneurial enterprise into a stand-alone professional services company to prepare for sale which led to a successful sale to the McLarens Group and subsequent integration into the Halliwell Global Group.

Integration of six disparate companies operating across twenty-three locations into a standard ISO accredited integrated management system for a ASX Listed corporation.

- **Merger & Acquisition**

Completed nine mergers and acquisition, including the recent sale of GKA Investigations and subsequent integration into the Halliwell Global Group.

- **Enterprise Risk Management**

Implemented an Enterprise Risk Management program into a multidisciplinary ASX Listed technical services organisation, which led to a significant incident and risk profile reduction resulting in multimillion-dollar insurance premium savings.

- **Petroleum Storage & Handling**

Directly and indirectly completed the design, construction, and maintenance across thousands of petroleum storage and handling facilities across the retail, industrial, commercial and defence sectors. Sample projects include all major oil company service station networks, Silverwater bulk terminal upgrade, Essendon Airport bulk fuel depot redevelopment, RAAF Darwin aviation hydrant, and Defence facility maintenance contracts throughout Qld and Northern Territory.

- **Environmental Remediation**

Directly and indirectly completed the demolition and environmental remediation of over one five hundred retail service station and fuel depot assets along with significant major infrastructure including the former Caltex Terminal at Ballast Point (Balmain) NSW.

- **Workplace, Health & Safety**

Engaged by a ASX Listed organisation to manage two separate coronial inquests resulting from workplace fatalities as well as lead the development, implementation organisational change through a WHS improvement program in response to those fatalities. Coronial inquest management and WHS improvement programs delivered significant improvements the performance of the organisation.
