BIOGRAPHY

Michael is a seasoned environmental and restoration professional with over 15 years of experience in industrial hygiene, remediation, and large-loss project management across healthcare, government, education, and commercial sectors. Background includes hands-on technical expertise in water, fire, smoke, and mold restoration, asbestos abatement, microbial remediation, and construction in sensitive environments, supported by IICRC and OSHA certifications. Progressively advanced into leadership roles overseeing regional operations, multidisciplinary project teams, and national sales strategy for environmental and restoration firms. Recognized for technical accuracy, compliance with IICRC, OSHA, and EPA standards, and the ability to provide defensible recommendations in complex loss environments. Adept at bridging field expertise with executive leadership, ensuring cost-effective, standards-based solutions while maintaining client confidence and safeguarding occupant health.
